

86" Interactive Touch Display

*UK Mainland Only

Overview

Stunning Enclosure

The flawless enclosure is crafted from black aluminium and assembled in segments so the enclosure can remain sexy and sleek with its rounded corners. It also has a polymer rear cover to keep it super slim and lightweight.

Connectivity

The rear of the screen features AV inputs that allow for more permanent connections such as AV in and out, Audio in and out, RS-232, VGA, DP, SPDIF, HDMI, YPbPr, USB.

Etched Glass

Improves tactility for smooth touch gestures. The anti-glare nano coating also diffuses external light so that images and videos are much clearer.

Easy Access Ports and Controls

Quickly and conveniently connect your own laptop to the screen using the front facing HDMI and Touch USB ports. There are also USB ports connected to the internal PC for easy access.

Built-in Android PC

Featuring a powerful integrated PC running Android 5.0 with 2GB RAM and 16GB ROM.

10-Point Infrared Touch Technology

Using the most durable and robust commercial touch technology available. Use anything such as your finger, or one of the styluses included, as your pointer.

Optional OPS PC

For a seamless solution an OPS PC can be integrated into the rear of the display. This allows you the flexibility to choose between Android and Windows and switch effortlessly between the two. Available with a cost effective OPS PC or a more powerful OPS PC.

Power/Menu Buttons

LED Backlight

The long lasting eco-friendly LED backlight focusses on optimum brightness and contrast; causing no eye strain as you would get from projectors. The panel and backlight have a lifespan in excess of 80,000 hours.

Freeze Frame Function

While your laptop is connected you can freeze the image on screen so that you can continue to work independently on your laptop.

Stylus Set Included

Two special 'Smart Pens' are included as well as an extendable pointer and two extra magnetic styluses for free.

- Integrated Android PC
- Optional OPS PC
- 16GB
- Integrated 16GB Storage
- 10 Touch Points
- 5 Year Onsite Warranty (UK Mainland Only)
- No Shadow
- 5-GHz Integrated Wi-Fi
- Low Power Consumption
- Anti-glare Glass
- LED Backlight
- VGA, HDMI, AV, Audio, YPbPr, RS-232, DisplayPort, SPDIF & USB Connectivity

Free MeetingPad Software

Multiplatform Compatibility

Android, Apple and Windows devices are compatible to connect with 'MeetingPad'

Wireless Mirroring

Connect to the Touch Screen from any smartphone, tablet, laptop, PC or Mac wirelessly. Using mobile devices you can mirror the display in both directions, and even take control of the Touch Screen, from anywhere on the same Wi-Fi network. Mirroring via 5GHz allows users the best wireless experience available with fast mirroring and less interference. All of this without the need of additional wires or transmitters.

File Sharing

Once your device and the Touch Screen are wirelessly connected you can quickly and easily share content to and from your device. Use the Eshare app to show videos, images and audio files stored on your smartphone, tablet, laptop or PC. You can also share files from the Touch Screen to your device using various methods such as email or scanning a QR code. Files can easily flow between the Touch Screen and your devices.

No Additional Hardware Required

Wirelessly mirror and share files straight from your device without the need for any additional hardware, such as transmitters or wires. However there is a handy Screen Projection Dongle USB included that makes mirroring from your PC or Mac fast and simple, without the need to install any software.

Flexible Working Tools

Personalise your experience by changing the background colour of the display, as well as the colour, thickness and opacity of the lines with your drawing tools.

Whiteboard

Replaces the traditional marker board in meeting rooms and classrooms. Annotate, draw and create meeting magic with the ultimate presentation tool.

Unlimited Connections

There is no limit to the amount of mobile devices that can simultaneously connect wirelessly to the screen.

Snipping Tool

Crop segments of the display to shift focus to more important sections of documents, screenshots or webpages.

Annotations

Make notes on your existing documents, screenshots and even webpages. Expand and innovate your content with ideas and concepts.

Web Browser

Surf the web with the integrated internet browser.

Scrolling Text

The marquee text tool is fun and innovative way to make important messages stand out, such as setting up welcome messages for your visitors.

Smart Pen Stylus

There are two interactive 'Smart Pens' included. These special styluses allows you to control the display wirelessly from anywhere in the room. You can change the pen tool colour, save annotated documents, navigate through a PowerPoint presentation and go back to the 'MeetingPad' home screen.

Full Android Control

Experience the Android revolution with the powerful integrated Android PC that runs everything. Preview and switch between external sources and even annotate over images, presentations, documents and webpages - either running from the 'MeetingPad' or from external devices. Our innovative 'MeetingPad' solution controls all functions allowing you to achieve state of the art interactive whiteboard functionality. Show videos, play music, and even run your apps; 'MeetingPad' brings the power to change your meetings forever to your fingertips.

Wireless Mirroring

Mirror what is on your Windows, Android or Apple device without the need for messy cables with the wireless mirroring feature this display offers. Great for presenting and sharing content during meetings it is done using your devices native streaming platform - Screen Mirroring for Android, Miracast for Windows and AirPlay for Apple. Mirroring the display from your mobile, tablet or laptop has never been easier.

Freeze-Frame Function

If you are running the Interactive Touch Display from your laptop you can "freeze" the content mirrored from your device, This allows you to use unplug your laptop and use it independently from the screen with the content still being on display.

Optional Windows OPS PC

Experience the best of both worlds with an upgrade to add a Windows OPS PC directly into the rear of your Interactive Touch Display. Having the world most popular operating system in Windows just a switch away from our 'MeetingPad' software offers the best in flexible working. Upgrading allows you to save space and avoid a tangle of messy wires that you use to get with attaching other laptops or PCs to your Interactive Touch Display.

Features

4K Display

The 4K Ultra HD display delivers incredible image quality with four times resolution higher than Full HD. Optimised for viewing distances both near and far the display allows your content to take center stage for all your visual communication. With a resolution of 3840 x 2160 you can revel in the displays ultra-high clarity as your 4K content is seen in the way it was meant to be.

Replace Projectors

Now is the time to replace old fashioned projector systems with an Interactive Touch Display that has a series of advantages over the antiquated presentation technology. Built to last over 16 times longer than a projector bulb and with drastically improved contrast and sharpness the images quality does not compare. There are also no annoying shadows cast on the display that you have with projectors.

Easy Access Ports and Controls

If you don't want to use the internal PC you can conveniently connect a laptop, or another external device, to the display's front ports. For more permanent connections there are a variety of AV inputs on the rear of the unit. The display also has clearly labelled buttons on the front face.

10 Point Touch

Having up to 10 touch points allows for a wider variety of applications than ever before. This kind of functionality allows you to manipulate images, zoom in an out as well as perform many other touch gestures; much like you would with a smartphone or tablet. It also allows for multiple users interacting with the screen at one time, ideal for group interaction and learning.

Built in 'MeetingPad' Software

Bundled with the screen is an easy to use meeting software program. Designed specifically for use with our Interactive Touch Displays this program combines the annotation style of traditional whiteboards with the convenience modern technology allows. You can read, write, edit, compare and most importantly annotate a variety of images, videos, PDF's, Office documents (Word, Excel, and PowerPoint) simultaneously.

Etched Anti-Glare Glass

The etched glass diffuses the light, increasing the clarity of the screen and makes text and images much more legible even in areas with strong light. The display's anti-glare nano coating improves scratch and impact resistance of the screen as well as improving tactility; essential for group interactivity.
